

SMART PORT LOGISTICS

POWERED BY

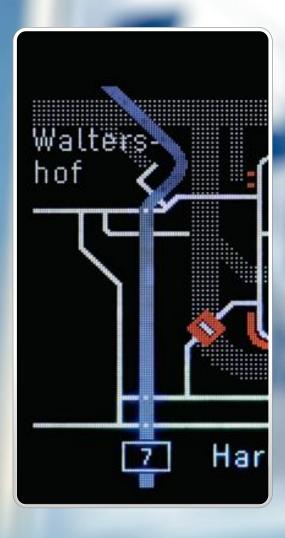

PORT OF HAMBURG

FACTS & FIGURES

HAMBURG PORT AUTHORITY - HPA

PORT ROAD MANAGEMENT

Basic elements of Port Road Management (PRM)

comprehensive traffic detection (induction loops, video detection, Weigh in Motion (WIM), Bluetooth) dynamic traffic information boards, to minimize the effects of grid disturbances

Concept PRM

graphical representation of information on the overall situation text panels for track-based information at strategic nodes

Ideas for a individual traffic steering

driver gets information from the Port Road Management Center in time about the traffic situation

messages are also available for the driver after passing the graphical information displays.

drivers get offered value-added services (eg, display of free parking at the next two rest houses on the route, traffic conditions)

VISION

INTERMODAL TRAFFIC MANAGEMENT

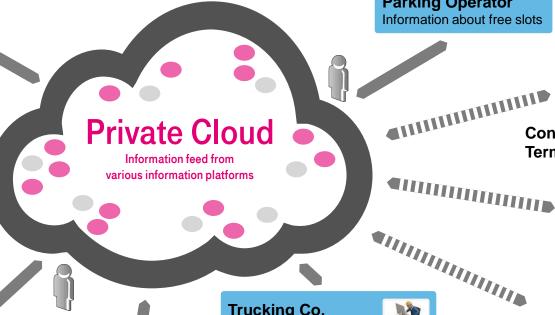

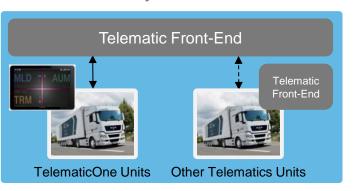

Port Road Management Infrastructure & **Traffic Information**

Parking Operator Information about free slots

Container **Terminals**

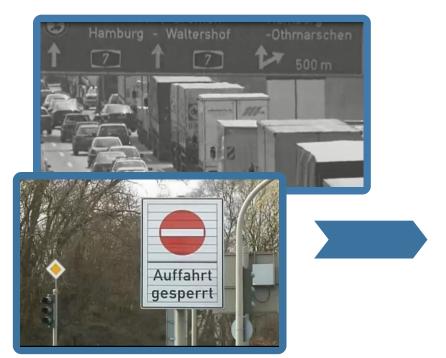

Systems of other **Stakeholders**

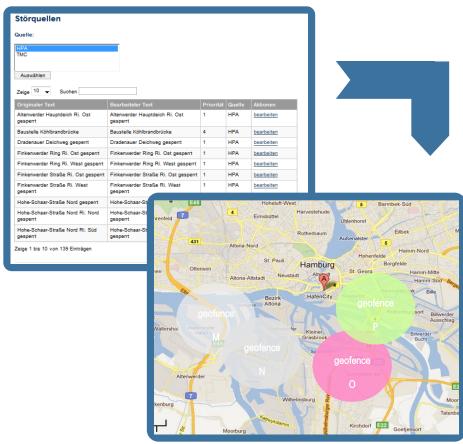

Once the **information** of the three transport modes are **united** in one system, [...] the Port of Hamburg could take **a leadership** over other competitors in **IT-supported business processes** in port industry.

INFRASTRUCTURE AND SERVICE PROVIDERS FEED THE SYSTEM WITH UP-TO-DATE INFORMATION AND ENABLE USERS TO MAKE SMART DECISIONS

INFRASTRUCTURE USERS GET PERSONALIZED SET OF RELEVANT TRAFFIC & INFRASTRUCTURE INFORMATION RIGHT IN TIME TO OPTIMIZE THEIR BUSINESS

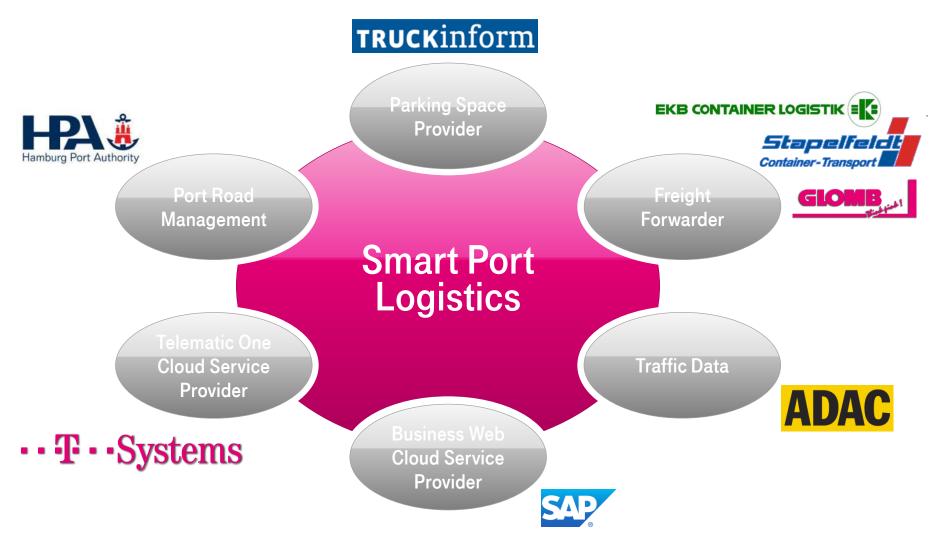

FLOATING CAR DATA FROM FREIGHT FORWARDERS PROVIDE A VALUABLE INPUT TO INFRASTRUCTURE ASSESSMENT AND OPTIMIZATION

SMART PORT LOGISTICS

FIELD TRIAL PARTICIPANTS

INTEGRATION & ENCAPSULATION OF M2M FUNCTIONALI-TIES WITHIN DT'S M2M INTEGRATION PLATFORM. SERVICE EXPOSURE THROUGH AN OPEN SERVICE MARKETPLACE

Truck- & Trailer OEMs **Logistic Network Operators Freight Forwarders** M2M Integration Platform other "Connected Things" **Connected Car Logistics Services** Services Service Complex Remote Marketplace **Event Processing Data Integration Device Management** Connectivity **Device Abstraction Data Collection** Management 3rd Party Truck & Bus Trailer Goods Infrastructure Devices
