ZFS Puts Net App Viability at Risk?

About a month ago, Network Appliance sued Sun to try to stop the competitive impact of ZFS on their business.

I can understand why they're upset – when Linux first came on the scene in Sun's core market, there were some here who responded the same way, asking "who can we sue?" But seeing the future, we didn't file an in

free software community and innovat

One of the ways we innovated was to expensive, proprietary storage to be servers. Customers save a ton of mo economic impact is staggering – and
